

To Netball America and participants of the CallidusCloud U.S. Open Netball Championships 2012

Congratulations on such a successful year and I really admire your efforts to help engage, educate and empower all Americans to adopt a healthy lifestyle that includes regular physical activity and good nutrition.

In support of First Lady Michelle Obama's *Let's Move!* initiative to end childhood obesity within a generation, the President's Council on Fitness, Sports & Nutrition is challenging Americans of all ages, abilities and backgrounds to achieve PALA+ (Presidential Active Lifestyle Award). I am excited to announce that Netball America has joined the efforts to get America's youth living a healthy lifestyle by becoming a President's Challenge Advocate to promote PALA+ participation. Partnerships like these are critical to ensuring that all Americans have access to physical activity and healthy food options.

It was an honor to have your President Sonya Ottaway and Netball supporter American Idol finalist Michael Johns attend the PALA+ presentation in Miami, Florida on May 22, 2012 for the "I Can Do It, You Can Do It" program. This is an initiative developed by the United States Department of Health and Human Services, Office on Disability, and is a physical fitness/activity program that links mentors with students with disabilities. 1,300 students attended the award presentation, and we had some students perform a Netball demonstration prior to the start of the ceremony.

I wish you the best in your endeavors and good luck with the Championships.

Dr Jayne Greenberg

About Dr. Jayne Greenberg

Dr. Jayne Greenberg is the District Director of Physical Education and Health Literacy, Miami-Dade County Public Schools. Miami-Dade County Public Schools was recently recognized as a best practice case study in the ***Nike Designed to Move Report***. Dr. Jayne has recently been appointed to the Institute of Medicine committee and is also a member of the President's Council on Fitness, Sports & Nutrition. She has also been recognized for developing one of the best physical education programs in the United States as well as creating a sailing program for students with autism, physical and intellectual disabilities that not only taught them how to sail their own boats, but taught them science, math, physical education and life skills.

Previously, Dr. Jayne served as Special Advisor on Youth Fitness to the President's Council on Physical Fitness and Sports and as President of the Florida Alliance for Health, Physical Education, Recreation, Dance, and Driver Education. Dr. Jayne assisted the U.S. Department of Health and Human Services in developing the "I Can Do It, You Can Do It Program," addressing physical activity for youth with disabilities.
